DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/10/2010 has been entered.

35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Independent claims 1,4, are now considered statutory under 35 U.S.C. 101 because these claims satisfy the M-T test. In the independent claims, reference to transforming the frames using processing circuitry and computing a noisy speech power spectrum for the frame of noisy speech using processing circuitry, satisfies the tied-to machine test. Additionally, these two steps are not considered to be nominal or insignificantly related to the remaining method steps (both steps are essential in generating parameters to perform the remaining method steps); the processing circuitry refers to a digital signal processing chip.

Allowable Subject Matter

4. Claims 1-11 are allowable over the prior art of record.

5. The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

The declaration filed 06/04/04 is defective for the reason that the error identified in the declaration does not appear to be corrected by the amended claims or the newly added claims. The declaration states, "Patentee failed to claim noise suppression in digital speech processing using spectral subtraction based on frequency smoothed noise." However, the current claims (in particular claims 1 and 4) do not appear to claim "**digital speech processing**" or noise suppression using "**spectral subtraction**" based on frequency smoothed noise. Because there have been amendments to the application since the last declaration filed by the inventors on 06/04/04, a supplemental declaration (or new declaration) is necessary to cover the errors that have been corrected by these amendments. The supplemental declaration must include the statement "Every error in the patent which was corrected in the present reissue application, and which is not covered by the prior declaration submitted in this application, arose without deceptive intention on the part of the applicant".

6. Claims 1-11 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.
